

SOP-G12: NIST Thermometer (annual calibration)

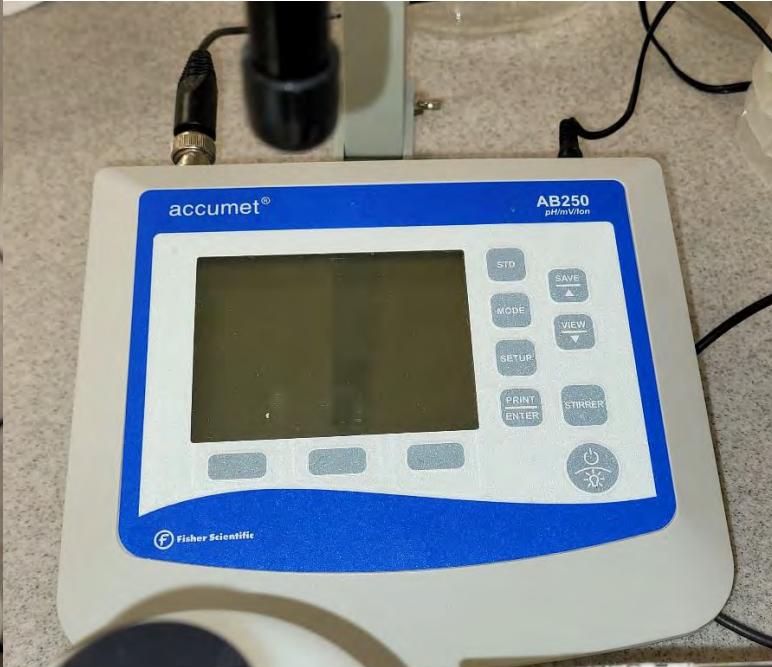

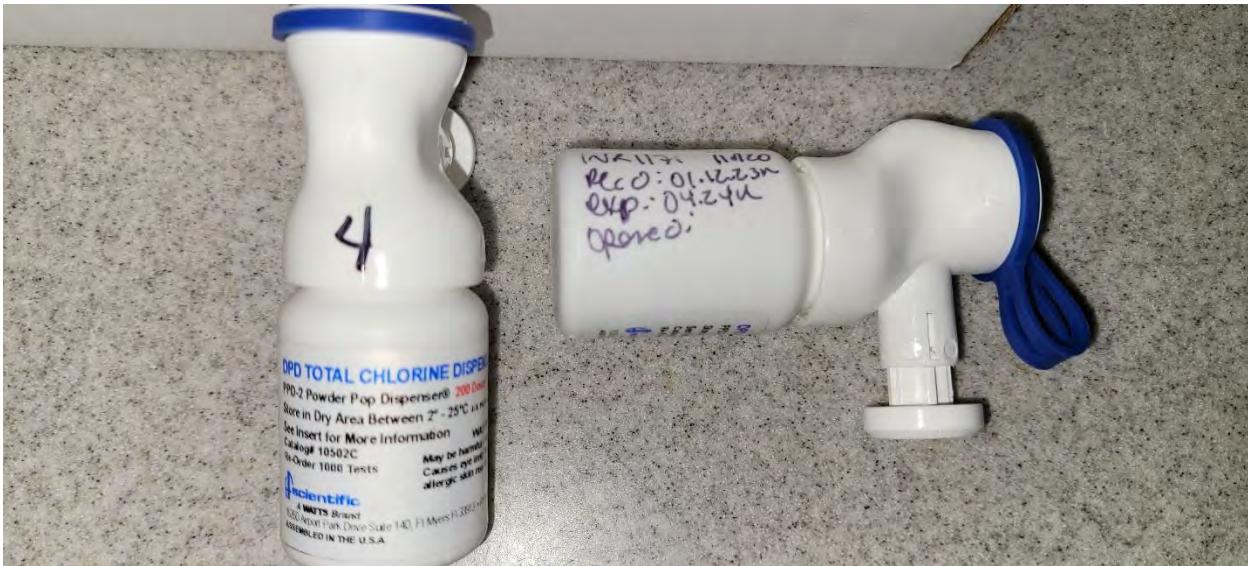

SOP-B1: Autoclave (used for algae media sterilization)

SOP-C8: Total residual chlorine  
meter/probe and reagents/standards

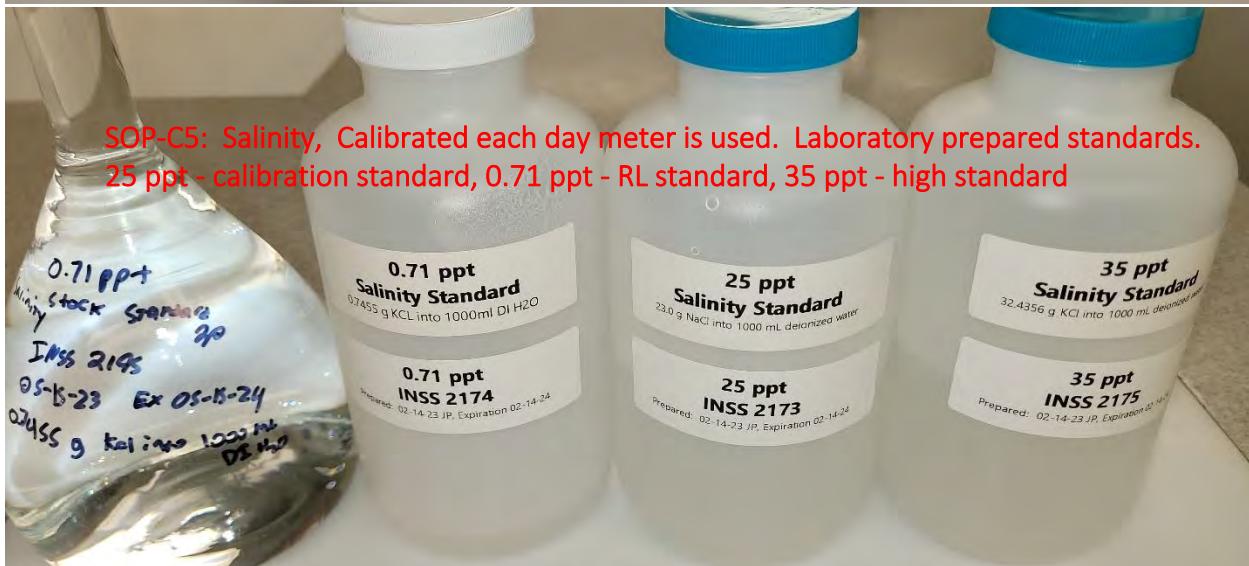

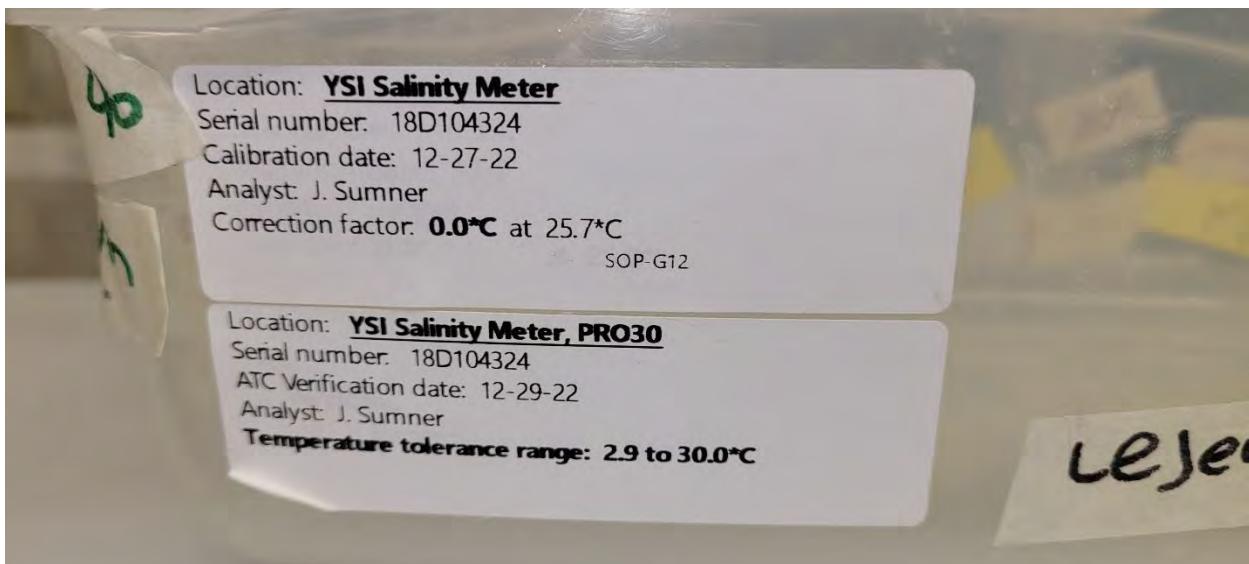

SOP-C8: Total residual chlorine  
DPD used for screening

SOP-C5: Salinity

Meter used

SOP-C5: Salinity, ATC verification and temperature sensor calibration (yearly)

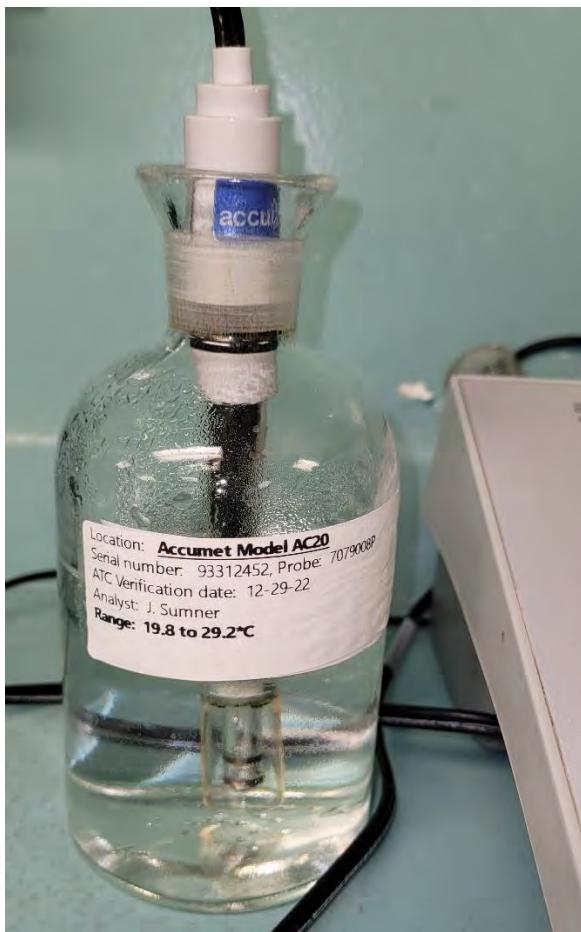

### SOP-C2: Dissolved oxygen

Meter and probe. Ambient air calibration each day of use.  
Temerature sensor verified quarterly.

SOP-C3: pH  
SOP-C4: Conductivity

Combination pH/Conductivity Meter.  
Calibration each day of use.

Conductivity ATC verification -  
acceptable range verified annually.

SOP-C6: Alkalinity  
SOP-C7: Hardness

Burette used for titrations.

SOP-C3: pH

SOP-C7: Alkalinity

Buffers used for pH calibration. Buffers are poured into smaller aliquots for daily use.

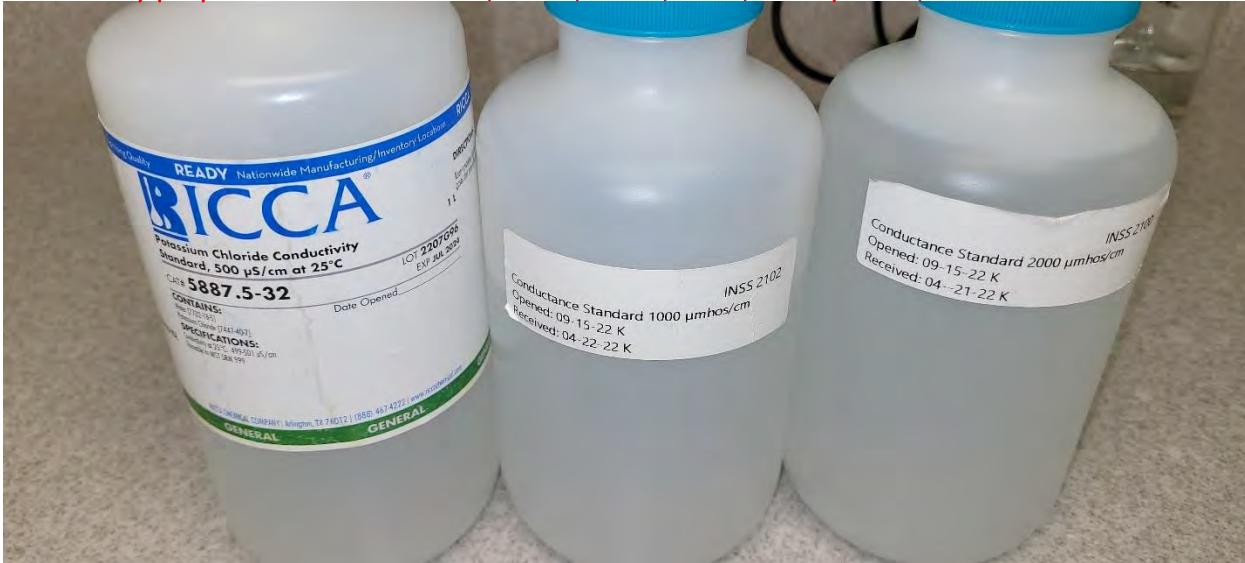

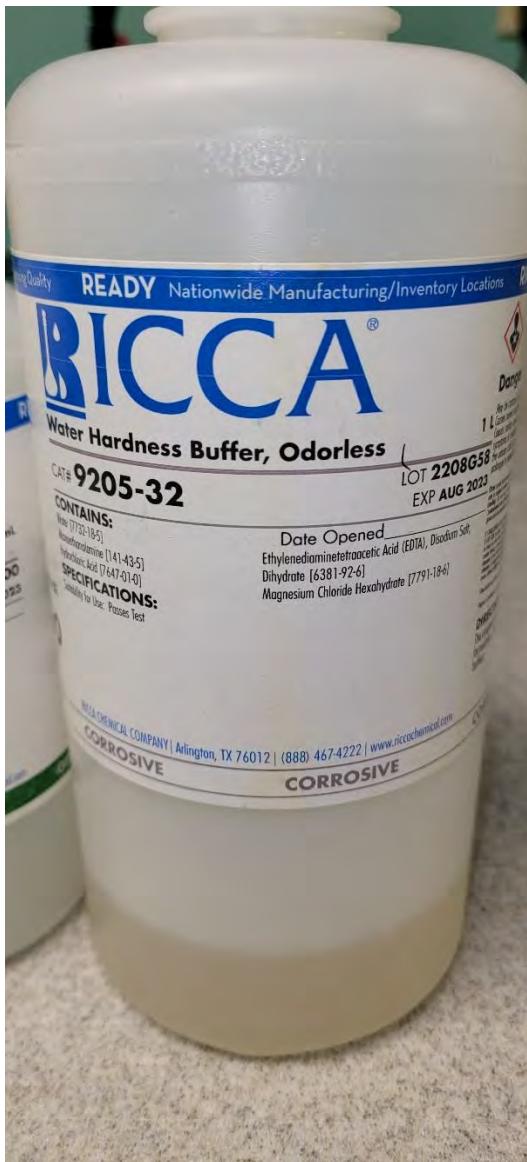

## SOP-C4: Conductivity

Standards used for cell constant / verification.

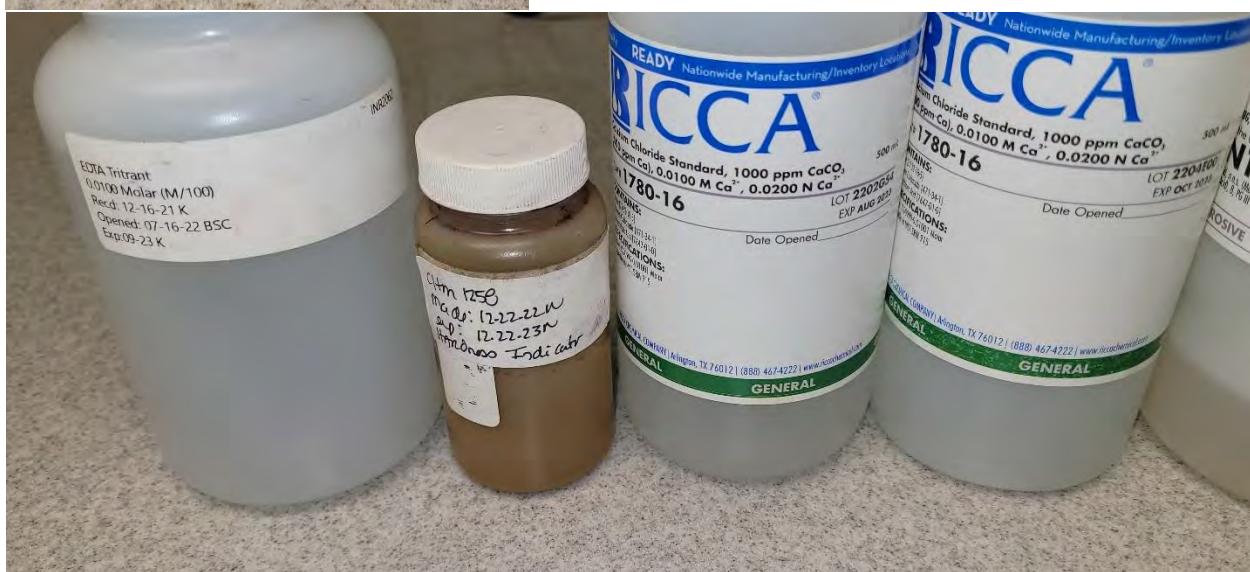

Purchased standards: 500, 1000 (cell constant) and 2000  $\mu\text{mhos}/\text{cm}$ .

Laboratory prepared standards: 14.9, 146.9, 717.5, 1412, 6667  $\mu\text{mhos}/\text{cm}$ .

SOP-C7: Hardness  
Reagents / Standards used for hardness.

SOP-C7: Hardness (EDTA titrant poured into smaller container for use).

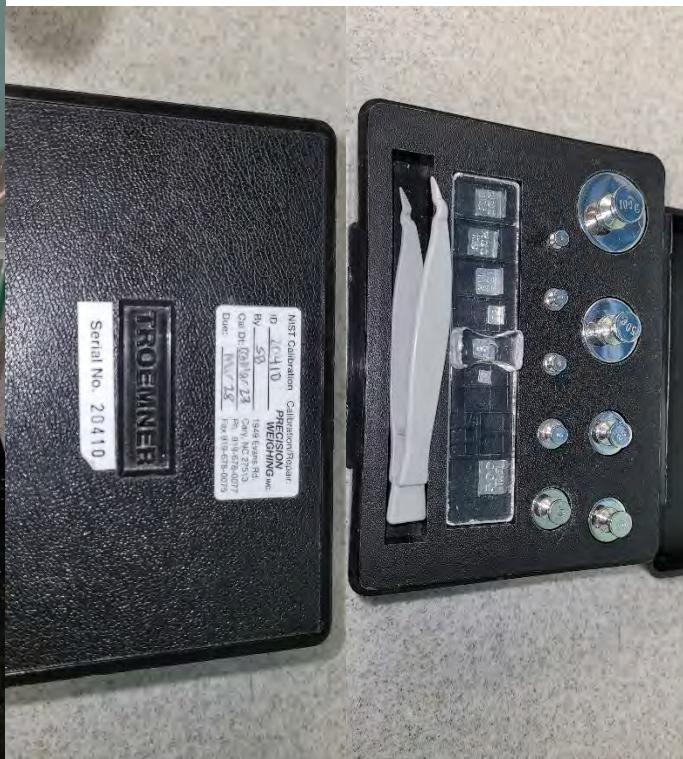

SOP-C6: Alkalinity

Reagents / Standards used for alkalinity (sulfuric acid poured into smaller container for use).

### SOP-G10: Balance and Weight Calibration

Mettler Toledo balance used for weighing chemicals / total solids for YWT (balance verified by Laboratory Instruments annually, weight set verified every 5 years by Precision Weighing)

### SOP-G10: Balance and Weight Calibration

Balance verified each day of use with at least 2 weights that bracket what is being weighted.

### SOP-G10: Balance and Weight Calibration

CAHN 28 balance used for weight determination in minnow/mysid tests (balance verified by Laboratory Instruments annually, balance calibrated each day of use with a 200.00 mg weight and checked with a 5.00 and 50.00 mg weights before and after each use). This range brackets the pans / pans + organisms weights and determines any balance drift.

SOP-G14: Illumination

Light intensity verified quarterly.

**SOP-G11: Mechanical pipette**

Pipette used to feed *Ceriodaphnia* tests and cultures, verified quarterly.

## Mettler-Toledo ME204 Balance Log

Instrument	Serial number	Calibration date	Calibration company
Mettler-Toledo ME204 Balance	C006982938	01-10-23	Laboratory Instrument Services
Certified Weights	20410	03-03-23	Precision Weighing

\*Certified weights must be within established control limits before measurements are made.

If certified weights exceed control limits, perform balance internal calibration and re-measure certified weights.

## Cahn 28 Automatic Electrobalance Log

Instrument	Serial number	Calibration date	Calibration company
Cahn 28 Automatic Electrobalance	41520	01-10-23	Laboratory Instrument Services
Certified Weights (10.05 and 50.04 mg)	20410	03-03-23	Precision Weighing
Certified Weight (200.01 mg)	1000055140	03-03-23	Precision Weighing

\*Initial and final verification weights must be within established control limits. If verification weights exceed control limits, re-zero and re-calibrate balance and re-analyze samples.

In tolerance as found?  YES  NO**Post Calibration Examination****Comments**

The balance was within tolerance for cornerload and reproducibility tests but out of tolerance for accuracy/linearity. This was corrected by calibrating the balance using traceable weights as listed. The balance was within tolerance once calibration was completed.

In tolerance as left?  YES  NO**Notes on tests performed**

**Cornerload testing** verifies that the instrument delivers similar weight readings, regardless of where on the weighing pan the object being weighed is placed. A significant discrepancy would indicate a structural failure in the load cell.

**Reproducibility testing** entails repeatedly weighing a given object, recording the results, and analyzing those results by comparing standard deviation against manufacturer's published tolerance.

**Accuracy/Linearity testing** verifies the accuracy of the instrument at intermediate values of weight.

All weights are given in grams unless otherwise noted

**Calibration is traceable to an International Standard - Weight Set Traceability Information**

Calibration Date: 20-May-2021  
Calibration Due Date: 31-May-2022  
Calibration Interval: 12 Months

Calib. Procedure: ATS-1007 Rev 2:Calibration of RTD Thermometer as a System

This instrument has been calibrated using primary or secondary standards whose calibration is traceable to the International System of Units (SI) through the National Institute of Standards and Technology (NIST) or applicable ASTM specification number for hardness testing equipment. Some measurements are traceable to natural, physical constants, consensus standards, or ratio type measurements.

The reported expanded measurement uncertainty is based on a standard uncertainty multiplied by a coverage factor of k=2, providing a confidence level of approximately 95%. This calibration certificate may contain data that is not covered by the Scope of Accreditation. The unaccredited test points, where applicable, are indicated by an asterisk (\*), or confined to clearly marked sections. Functional tests are not accredited. The expanded measurement uncertainty is not considered when determining in-tolerance or out-of-tolerance conditions. Results are reviewed, if applicable, to establish where any measurement results exceeded the stated calibration tolerance and to communicate results by means of this certificate.

All calibrations are performed in accordance with the ATS Quality Manual QM1, Rev. 18, dated 10/16/20. Applied Technical Services, Inc.'s Quality System complies with the applicable requirements of ANSI/NCSL Z540-1, ISO 9001:2015, 10CFR50 Appendix B, 10CFR Part 21, and ISO/IEC 17025:2017. The reported data is valid only at the time of the test and related only to the item calibrated. Calibration due dates appearing on this certificate and calibration label are determined by the client and do not imply continued conformance to specifications. This certificate shall not be reproduced except in full, without written permission of Applied Technical Services, Inc.

Technical Remarks:

- Test points are customer specific.
- Tolerances previously widened at -80°C test point as per customer request. POC: S. Brabble (05/19/2020).

Certificate #3149506

Customer:  
Precision Weighing - Cary  
1949 Evans Road  
Cary, NC 27513

Calibration Location:  
Applied Technical Services  
1049 Triad Court  
Marietta, GA 30062

**Instrument Information:**

Manufacturer: Control Company (Traceable)  
Model Number: 15-081-102  
Description: Thermometer, Digital W/Probe  
Asset Number: 170431637  
Serial Number: 170431637  
PO Number: 15823

**Calibration Information/Results:**

As Found Condition : In Tolerance  
Action Taken / As Left: In Tolerance - No Adjustment  
Temperature: 71° F  
Humidity: 40% RH  
Calibration Date: 25-Mar-2022  
Calibration Due Date: 31-Mar-2023  
Calibration Interval: 12 Months

**Calib. Procedure:** ATS-1007 Rev 2:Calibration of RTD Thermometer as a System

This instrument has been calibrated using primary or secondary standards whose calibration is traceable to the International System of Units (SI) through the National Institute of Standards and Technology (NIST) or applicable ASTM specification number for hardness testing equipment. Some measurements are traceable to natural, physical constants, consensus standards, or ratio type measurements.

The reported expanded measurement uncertainty is based on a standard uncertainty multiplied by a coverage factor of k=2, providing a confidence level of approximately 95%. This calibration certificate may contain data that is not covered by the Scope of Accreditation. The unaccredited test points, where applicable, are indicated by an asterisk (\*), or confined to clearly marked sections. Functional tests are not accredited. The expanded measurement uncertainty is not considered when determining in-tolerance or out-of-tolerance conditions. Results are reviewed, if applicable, to establish where any measurement results exceeded the stated calibration tolerance and to communicate results by means of this certificate.

All calibrations are performed in accordance with the ATS Quality Manual QM1, Rev. 19, dated 03-01-22. Applied Technical Services, Quality System complies with the applicable requirements of ANSI/NCSI, Z540-1, ISO 9001:2015, 10CFR50 Appendix B, 10CFR Part 21, and ISO/IEC 17025:2017. The reported data is valid only at the time of the test and related only to the item calibrated. Calibration due dates appearing on this certificate and calibration label are determined by the client and do not imply continued conformance to specifications. This certificate shall not be reproduced except in full, without written permission of Applied Technical Services.

**Technical Remarks:**

\* Tolerances widened as previous calibration as per customer request, POC: S. Brabble (T: 2773536).

### COMMENTS/CORRECTIVE ACTION:

A leak test may be performed by filling the pipette tip with distilled or deionized water to the maximum nominal volume and placing the pipette on a vibration-free stand. Observe the meniscus in the tip for 1 minute. After 1 minute, there should be no visible droplet formation at the tip. If there are no signs of droplet formation, proceed with the calibration check. If droplet formation is observed, successful maintenance and corrective action must be taken or the pipette must not be used.

Complete green-shaded cells only (obtain Z Corr. Factor from Table 1 on Sheet 2). The spreadsheet will populate all unshaded cells for you.

Obtain RE and CV tolerances from the pipettor manufacturer's specifications.

Use appropriate ASTM 1 or 2 tolerances for the balance checks (refer to sheet 3).

If dial setting (volume) is in mls, mass should be recorded in gm. If dial setting (volume) is in  $\mu$ l, mass should be recorded in mg.

A leak test may be performed by filling the pipette tip with distilled or deionized water to the maximum nominal volume and placing the pipette on a vibration-free stand. Observe the meniscus in the tip for 1 minute. After 1 minute, there should be no visible droplet formation at the tip. If there are no signs of droplet formation, proceed with the calibration check. If droplet formation is observed, successful maintenance and corrective action must be taken or the pipette must not be used.

Complete green-shaded cells only (obtain Z Corr. Factor from Table 1 on Sheet 2). The spreadsheet will populate all unshaded cells for you.

Obtain RE and CV tolerances from the pipettor manufacturer's specifications.

Use appropriate ASTM 1 or 2 tolerances for the balance checks (refer to sheet 3).

If dial setting (volume) is in mls, mass should be recorded in gm. If dial setting (volume) is in  $\mu$ l, mass should be recorded in mg.

PASS/FAIL	PASS		

### COMMENTS/CORRECTIVE ACTION:

A leak test may be performed by filling the pipette tip with distilled or deionized water to the maximum nominal volume and placing the pipette on a vibration-free stand. Observe the meniscus in the tip for 1 minute. After 1 minute, there should be no visible droplet formation at the tip. If there are no signs of droplet formation, proceed with the calibration check. If droplet formation is observed, successful maintenance and corrective action must be taken or the pipette must not be used.

Complete green-shaded cells only (obtain Z Corr. Factor from Table 1 on Sheet 2). The spreadsheet will populate all unshaded cells for you.

Obtain RE and CV tolerances from the pipettor manufacturer's specifications.

Use appropriate ASTM 1 or 2 tolerances for the balance checks (refer to sheet 3).

If dial setting (volume) is in mls, mass should be recorded in gm. If dial setting (volume) is in  $\mu$ l, mass should be recorded in mg.

CV Tolerance	PASS		
PASS/FAIL	PASS		

A leak test may be performed by filling the pipette tip with distilled or deionized water to the maximum nominal volume and placing the pipette on a vibration-free stand. Observe the meniscus in the tip for 1 minute. After 1 minute, there should be no visible droplet formation at the tip. If there are no signs of droplet formation, proceed with the calibration check. If droplet formation is observed, successful maintenance and corrective action must be taken or the pipette must not be used.

Complete green-shaded cells only (obtain Z Corr. Factor from Table 1 on Sheet 2). The spreadsheet will populate all unshaded cells for you.

Obtain RE and CV tolerances from the pipettor manufacturer's specifications.

Use appropriate ASTM 1 or 2 tolerances for the balance checks (refer to sheet 3).

If dial setting (volume) is in mls, mass should be recorded in gm. If dial setting (volume) is in  $\mu$ l, mass should be recorded in mg.

Multiple weigh analysis of minnow pans performed 02-15-22 to verify drying time is adequate.

Multiple weigh of final pans for growth determinations in chronic toxicity tests.

Test type: P. promelas Chronic Reference Toxicant Test  
Test dates: JANUARY 04-11, 2022  
Associated test: Pp KC1CR ± 8%

1st Weight = Pans were dried for 24-hours at  $60 \pm 2^{\circ}\text{C}$ , desiccated, and weighed following standard operating procedures.

2nd Weight = The same pans used for determining the 1st weight measurements were dried for an additional 24-hours at  $60 \pm 2^{\circ}\text{C}$ , desiccated, and weighed following standard operating procedures.

Minnow transfer volume (annual verification < 0.25 mL)

Page 1 of 1

Larval Fish Transfer Volume

Analyst: JL

Species: P. promelas

Date: 02-01-22

Source / Batch: Spawn date: 02-01-22

Ambient temperature: 24.3 °C

Wet Weight of 10 Larvae (g): 0.0544

Estimate transfer volume, where minnows are allowed to swim from the pipette into the test vessel.

Numerically label 10 medicine cups.

Add 10 mL MHSW to each of the 10 cups.

Measure and record the weight of each cup containing MHSW.

Transfer 10 larvae to each cup, following procedures identified in SOP-AT18, AT47, or AT53 for vertebrate acute toxicity tests.

Transfer the larvae in a manner that allows them to swim from the pipette into the MHSW contained in each cup.

Measure and record the weight of each cup containing MHSW with 10 larvae.

Determine each transfer volume and average transfer volume.

Replicate Number	Initial Weight Medicine cup + 10 mL MHSW (g)	Final Weight Medicine cup + 10 mL MHSW + 10 Larval Fish transferred (g)	Transfer Volume Final - Initial Weight (g = mL)

## Sample Receipt Checklist

Client: ETS, ETS, Inc Date: 3/9/22 Report Number: 2022-4354

Receipt of sample:	ECHEM Pickup <input checked="" type="checkbox"/>	Client Delivery <input type="checkbox"/>	UPS <input type="checkbox"/>	FedEx <input type="checkbox"/>	Other <input type="checkbox"/>
<input type="checkbox"/> YES	<input type="checkbox"/> NO	<input type="checkbox"/> N/A	1. Were custody seals present on the cooler?		
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	<input type="checkbox"/> N/A	2. If custody seals were present, were they intact/unbroken?		
Original temperature upon receipt <u>1.0</u> °C			Corrected temperature upon receipt _____ °C		
How temperature taken: <input type="checkbox"/> Temperature Blank <input checked="" type="checkbox"/> Against Bottles					
IR Gun ID: Thomas Traceable S/N: 210835468			IR Gun Correction Factor °C: 0.0		
<input type="checkbox"/> YES	<input type="checkbox"/> NO	3. If temperature of cooler exceeded 6°C, was Project Mgr./QA notified?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	4. Were proper custody procedures (relinquished/received) followed?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	5. Were sample ID's listed on the COC?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	6. Were samples ID's listed on sample containers?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	7. Were collection date and time listed on the COC?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	8. Were tests to be performed listed on the COC?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	9. Did samples arrive in proper containers for each test?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	10. Did samples arrive in good condition for each test?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	11. Was adequate sample volume available?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	12. Were samples received within proper holding time for requested tests?			
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	13. Were acid preserved samples received at a pH of <2? *			
<input type="checkbox"/> YES	<input type="checkbox"/> NO	14. Were cyanide samples received at a pH >12?			
<input type="checkbox"/> YES	<input type="checkbox"/> NO	15. Were sulfide samples received at a pH >9?			
<input type="checkbox"/> YES	<input type="checkbox"/> NO	16. Were NH <sub>3</sub> /TKN/Phenol received at a chlorine residual of <0.5 m/L? **			
<input type="checkbox"/> YES	<input type="checkbox"/> NO	17. Were Sulfide/Cyanide received at a chlorine residual of <0.5 m/L?			
<input type="checkbox"/> YES	<input type="checkbox"/> NO	18. Were orthophosphate samples filtered in the field within 15 minutes?			

\* TOC/Volatiles are pH checked at time of analysis and recorded on the benchsheet.

\*\* Bacteria samples are checked for Chlorine at time of analysis and recorded on the benchsheet.

Sample Preservation:	(Must be completed for any sample(s) incorrectly preserved or with headspace)			
Sample(s) _____	were received incorrectly preserved and were adjusted accordingly			
by adding (circle one):	H <sub>2</sub> SO <sub>4</sub>	HNO <sub>3</sub>	HCl	NaOH
Time of preservation: _____	If more than one preservative is needed, note in comments below			
Note: Notify customer service immediately for incorrectly preserved samples. Obtain a new sample or notify the state lab if directed to analyzed by the customer. Who was notified, date and time: _____				
Volatiles Sample(s) _____	were received with headspace

<input type="checkbox"/> YES	<input type="checkbox"/> NO	18. Were orthophosphate samples filtered in the field within 15 minutes?				

\* TOC/Volatiles are pH checked at time of analysis and recorded on the benchsheet.

\*\* Bacteria samples are checked for Chlorine at time of analysis and recorded on the benchsheet.

Sample Preservation:	(Must be completed for any sample(s) incorrectly preserved or with headspace)			
Sample(s)	were received incorrectly preserved and were adjusted accordingly			
by adding (circle one):	H <sub>2</sub> SO <sub>4</sub>	HNO <sub>3</sub>	HCl	NaOH
Time of preservation:	If more than one preservative is needed, notate in comments below			
Note: Notify customer service immediately for incorrectly preserved samples. Obtain a new sample or notify the state lab if directed to analyzed by the customer. Who was notified, date and time:				
Volatiles Sample(s)	were received with headspace

## Laboratory Report

Client	Environmental Testing Solutions Kelley E. Keenan 351 Depot St. Asheville, NC 28801-4310	Project:	ETS, Inc.
		Work Order:	0071549
		Received:	07/31/2020 09:55

Dear Client:

Rogers and Callcott appreciates the opportunity to be of service to you. The attached laboratory services report includes analytical results and chain of custody for samples that were received on July 31, 2020. Rogers and Callcott maintains a formal QA/QC program. Unless otherwise noted, all analyses performed under NELAP certification have complied with all the requirements for the TNI standard. The analyses met the QA/QC confidence interval for each test method unless otherwise qualified. Estimated uncertainty is available upon request.

Privileged / Confidential information may be contained in this report and is intended only for the use of the addressee. If you are not the addressee, or the person responsible for delivering to the person addressed, you may not copy or deliver this message to anyone else. If you receive this message by mistake, please notify Rogers and Callcott immediately.

We strive to provide excellent service to our clients. Please contact Lauren Hollister, your Project Manager, at [lhollister@rcenviro.com](mailto:lhollister@rcenviro.com), (864)-232-1556 if you have any questions about this report.

Report Approved By:

A handwritten signature in black ink that reads "Lauren W. Hollister".

#### Data Qualifiers and Definitions

- ND Analyte NOT DETECTED at or above the reporting limit
- NR Not reported
- RPD Relative Percent Difference
- J The reported J value is between the laboratory's MRL and MDL. Constituents detected in this range, have a higher degree of uncertainty and a lower level of precision. The J value was reported at the client's request or as a regulatory requirement.

## Sample Receipt Verification

Client: ETSDate Received: 7-31-20Work Order: 0071549Carrier Name: Client FedEx UPS US Mail  Courier Field Services Other: \_\_\_\_\_

Tracking Number: \_\_\_\_\_

Receipt Criteria	Y e s	N o	N A	Comments
Shipping container / cooler intact?	X			Damaged   Leaking   Other:
Custody seals intact?	X	X		H&W 7-31-20
COC included with samples?	X			
COC signed when relinquished and received?	X			
Sample bottles intact?	X			Damaged   Leaking   Other:
Sample ID on COC agree with label on bottle(s)?	X			
Date / time on COC agree with label on bottle(s)?	X			
Number of bottles on COC agrees with number of bottles received?	X			
Samples received within holding time?	X			
Sample volume sufficient for analysis?	X			
VOA vials free of headspace (<6mm bubble)?			X	
Samples cooled? Temp at receipt recorded on COC Temp measured with IR thermometer - SN: 97050067	X			Ice   Cold Packs   Dry Ice   None
Samples requiring pH preservation at proper pH? Note: Samples for metals analysis may be preserved upon receipt in the lab.	X			
Samples dechlorinated for parameters requiring chlorine removal at the time of sample collection?			X	

If in-house preservation used – record Lot #

HCL		H <sub>3</sub> PO <sub>4</sub>	
H <sub>2</sub> SO <sub>4</sub>		NaOH	
HNO <sub>3</sub>		Other	

Comments:

Were non-conformance issues noted at sample receipt? Yes or  No

Non-Conformance issue other than noted above:

## Laboratory Report

<b>Client</b>	Environmental Testing Solutions Kelley E. Keenan 351 Depot St. Asheville, NC 28801-4310	<b>Project:</b> <b>Work Order:</b> <b>Received:</b>	ETS Inc 1091445 09/29/2021 09:30
---------------	--	---	--

Dear Client:

Rogers and Callcott appreciates the opportunity to be of service to you. The attached laboratory services report includes analytical results and chain of custody for samples that were received on September 29, 2021. Rogers and Callcott maintains a formal QA/QC program. Unless otherwise noted, all analyses performed under NELAP certification have complied with all the requirements for the TNI standard. The analyses met the QA/QC confidence interval for each test method unless otherwise qualified. Estimated uncertainty is available upon request.

Privileged / Confidential information may be contained in this report and is intended only for the use of the addressee. If you are not the addressee, or the person responsible for delivering to the person addressed, you may not copy or deliver this message to anyone else. If you receive this message by mistake, please notify Rogers and Callcott immediately.

We strive to provide excellent service to our clients. Please contact Lauren Hollister, your Project Manager, at [lhollister@rcenviro.com](mailto:lhollister@rcenviro.com), (864)-232-1556 if you have any questions about this report.

Report Approved By:

Artemia nauplii: Brine Shrimp Eggs (Brine Shrimp Direct), Frozen Brine Shrimp: Flat Packs (Brine Shrimp Direct), Frozen Brine Shrimp: Cubes (Brine Shrimp Direct), Freeze Dried Brine Shrimp: Aquatox Fish Diet (Zeigler) Flake Food: Aquatox Fish Diet (Zeigler)

**Pimephales promelas Daily Culture Maintenance, Week of April 23, 2023**  
 (Initial Each Task Completed)

Note: Wash hands/arms prior to placing hands into tanks.

	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
<b>System Maintenance</b>							
Temperature (°C), Acceptable range = $25.0 \pm 2.0^{\circ}\text{C}$	24.0	24.0	24.2	24.0	24.2	24.2	23.9
Check and repair: leaks, water flow / aeration in all tanks, amber alarms?, all pumps flowing	AB	IP	IP	IP	IP	IP	AB
Backwash sand filter, add DI water to system, add chemicals		IP					
<b>Larvae Maintenance</b>							
If larvae are hatching: move unhatched larvae on tiles to next spawn date, record end hatch time for this spawn date in egg collection log	04-25-23 AB	IP	AB	IP	IP	IP	AB
Remove tiles completely hatched and soak in bleach solution. Ensure all tiles are upright, remove fugs from tiles and tiles containing unfertilized eggs in all trays.		IP	AB	IP	IP		AB
If there are no empty larval tanks, remove and discard oldest larvae batch		IP	04-25-23 AB	04-26-23 IP	IP	IP	04-29
Transfer hatched larvae to a new tank and place into culture system	IP	AB	IP	IP	IP	IP	AB
Remove any dead larvae or food in all larval tanks	IP	AB	IP	IP	IP	IP	AB
Feed larvae artemia (If 3 or more larval tanks, have 2 artemia separatory funnels.), remake artemia if necessary, record time in feeding log	AB 04-26-23	IP	IP	IP	IP	IP	AB
<b>Egg Collection and Maintenance</b>							
Check all tanks for eggs, remove tiles with eggs, clean back of each tile, rinse with tap water and place in new tray with HSW, label with today's date	AB	IP	IP	IP			
Record the spawn date/time and tank ID's where eggs were collected, replace missing tiles in tanks	AB	IP	IP	IP			
Make 1 tray for next day	AB		IP	IP			
<b>Adult Minnow Maintenance</b>							
Feed adults (AM feeding): flake food, if collecting tiles: feed frozen food to breeder tanks, record time in feeding log	AB	IP	IP	IP	IP	IP	AB
Remove and replace (using black stock tanks) any dead or unhealthy minnows.	04-25-23 AB	IP	IP	IP	IP	IP	04-29
Verify 5 females and 1 male in each breeder tank, 25 females and 5 males in large stock tanks.		IP	IP	IP	IP	IP	
<b>Mid-Day</b>							
Feed adults (MID-DAY feeding): flake food, record feeding time in feeding log	AB	IP	IP	IP	IP	IP	AB
Check if larvae are starting to hatch in tray with oldest spawn date, record start hatch time for this spawn date in egg collection log	AB	IP	IP	IP	IP	IP	AB
<b>End-of-Day</b>							
Remove any dead larvae or food in all larval tanks	04-25-23 AB	IP	IP	IP	IP	IP	AB
Feed larvae artemia and remake artemia, record feeding time in feeding log	04-26-23 AB	IP	IP	IP	IP	IP	AB
Feed adults (PM feeding): flake food, record feeding time in feeding log	AB	IP	IP	IP	IP	IP	AB
Check and repair: leaks, water flow / aeration in all tanks, amber alarms?, all pumps flowing	AB	IP	IP	IP	IP	IP	AB
DI system valve and garden hose valves off	AB	IP	IP	IP	IP	IP	AB
Temperature (°C), Acceptable range = $25.0 \pm 2.0^{\circ}\text{C}$	24.1	24.1	24.1	24.1	24.2	24.1	24.0
Front and metal doors locked	AB	IP	IP	IP	IP	IP	AB
<b>Comments</b>
